# Release Notes

Version 8.6.0.3

These notes describe new and updated features in the WebEOC 8.6.0.3 release. More information is available through the Support Center or by contacting Juvare Support at support@juvare.com.

## Resolved Issues

### Toggle Filters Associated With New Records No Longer Appearing

After a filter is toggled on and then off, any new records added would no longer appear. This issue has been resolved.

### Extended Inactivity Inhibits Board Refreshing and Logs Out User

During extended periods of inactivity, board refreshing would stop working, causing new information to disappear and potentially logging out the user. This issue has been resolved.
