Announcing WebEOC 8.6.0.1

We are pleased to announce that **WebEOC 8.6.0.1** has been released. This latest version includes features and enhancements that are targeted to streamline the user experience and improve overall organizational efficiency.

Highlights of this release are described below.

Release Highlights

Resolved Issue

Problems with Dropdown Lists

When using the dropdown lists for filters when on a primary List View, the dropdown would show both the Parent and Sub List entries. This issue has been resolved.

Updates

Delayed PDF Generation in Boards

Administrators now have an option to keep PDFs from generating until their view has completely loaded. When this option is enabled, a new BoardScript function *StartPDFGeneration* can be used to initiate PDF generation once the view is ready.
