WebEOC®
Product Announcement

Version 8.2.0.3

This announcement describes changes made to the WebEOC solution. If you have questions about changes not covered in this document, more information is available on the WebEOC Client Hub or by contacting your Client Services Manager.

Resolutions

Addressed Viewlink Issues

A javascript caching issue that caused viewlinks not to work for some users has been resolved.

The error causing viewlinks to produce an error if a view did not have a `<head>` tag has also been resolved.

Enabled Display of Create Record Viewlink

The **Create Record** viewlink in the *Comments* section now displays when you view an existing record within the default Resource Request/Task Assignments board.

Similar issues with board permissions tags in other boards have also been resolved.

Fixed Pull Service Issue

An issue that resulted in the prevention of WebEOC Fusion messages from being delivered has been addressed and fixed.

Resolved RSS Feed Issue

RSS feeds are properly being pulled in to WebEOC.

Fixed Calendar Tag

The issue causing an error when clicking on an entry in the calendar has been resolved.

Resolved Password Reset Link Error

The **Retrieve Password** link, identified by some clients as not functioning properly, now takes all users to the *Change Password* screen as expected.

Enabled Resizing of Windows

When opening links from the control panel, you can now resize the windows that subsequently open.
