WebEOC®

Product Announcement

Version 8.2.0.4

This announcement describes changes made to the WebEOC solution. If you have questions about changes not covered in this document, more information is available on the WebEOC Client Hub or by contacting your Client Services Manager.

Resolutions

Enhanced Performance When Editing Users and Positions

The system has been enhanced to eliminate timeouts that may have occurred when attempting to edit users and/or positions associated with a very large number of users or positions.

Fixed NWS Plugin Error

When using the *NWS Weather Alerts* plugin, the feed access issue encountered after the user selects a state has been fixed.

Resolved Check Box Selection Issues in Admin Window

Throughout the admin interface, you can now consistently select check boxes associated with adding positions or groups to users, positions, and so forth.

Resolved WebEOC API UpdateDataBatch Method Issue

The UpdateDataBatch method now returns a complete array as expected when new data is added or existing data is updated.
