

## Ad-Hoc Notifications Plug-In 1.13.0 Release Notes

These notes describe enhancements introduced in the Ad-Hoc Notifications Plug-In 1.13.0 release scheduled for Wednesday, February 3, 2021. More information is available through your solution or by contacting the Juvare Support Center at 877-771-0911 or [support@juvare.com](mailto:support@juvare.com).

### Notification Templates

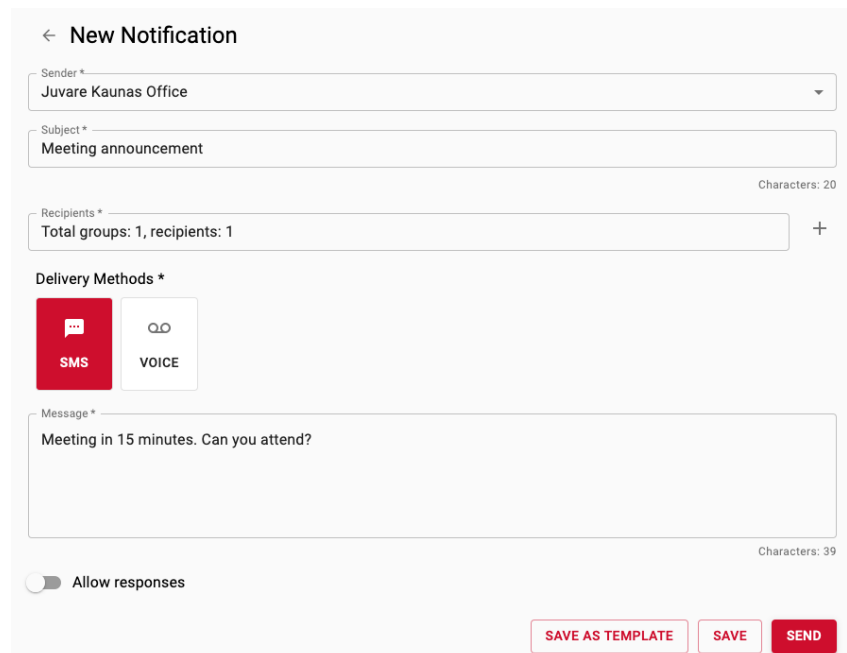

- Now, you can compose notifications using templates. Templates are easily accessed through a dedicated tab, which allows you to quickly compose notifications by adding and/or editing the sender, recipients, and message.
- While composing a notification using a template, you can seamlessly update the template or create a new one. Likewise, templates can be managed directly through the dedicated tab.

### Text Notifications Sent to All Phone Numbers

Previously, notifications were only sent to the primary number on an account. Now, Ad-hoc Notifications send text notifications to all phone numbers on a user's account, making every effort possible to deliver the notification in a timely manner.

### User Experience Improvements

- When composing a notification, all information is now available on a single page to streamline the workflow and provide a better user experience when editing or saving a draft.
- The details for sent notifications are now available through a dedicated tab that provides historical information.

The screenshot shows a 'New Notification' form with the following fields and options:

- Sender \***: Juvare Kaunas Office (dropdown menu)
- Subject \***: Meeting announcement (text input, 20 characters remaining)
- Recipients \***: Total groups: 1, recipients: 1 (text input, plus icon for adding more)
- Delivery Methods \***: Two buttons, 'SMS' (highlighted in red) and 'VOICE' (white with red border).
- Message \***: Meeting in 15 minutes. Can you attend? (text input, 39 characters remaining)
- Allow responses**: A toggle switch that is currently turned off.
- Bottom Buttons**: Three buttons: 'SAVE AS TEMPLATE' (white with red border), 'SAVE' (white with red border), and 'SEND' (solid red).

### Resolutions

Resolved minor issues related to usability and navigation.
