# Ad-Hoc Notifications Plug-In 1.15.0 Release Notes

These notes describe enhancements introduced in the Ad-Hoc Notifications Plug-In 1.15.0 release for eICS that is scheduled for Wednesday, March 17, 2021. More information is available through your solution or by contacting the Juvare Support Center at 877-771-0911 or support@juvare.com.

Import External Recipients

Now, you can send notifications to people who do not have eICS accounts. Simply download the comma-separated values (CSV) template, populate the file with contact details, and import the file. This enhancement allows you to manage dynamic contact lists externally and quickly upload them, when necessary, on relevant notifications.

Resolutions

Resolved minor issues related to usability and navigation.
