

## EMResource™ Release Notes

These notes describe highlights of the EMResource 3.51 release scheduled for Wednesday, September 16, 2020. More information is available through your solution or by contacting the Juvare Support Center at 877-771-0911 or [support@juvare.com](mailto:support@juvare.com).

### Validation Rules

- Expanded the TeleTracking validation rule set to include newly required and supplemental rules that enforce validation for successful Health and Human Services (HHS) COVID-19 data submissions.
- Resolved a validation processing issue so that validation rules are now consistently referencing the most recently entered values.

### Bed Utilization Dashboard Gadget

Greatly increased the bed type options that can be added to the Bed Utilization Dashboard Gadget and updated the gadget to display the regional status type name instead of the standard status type. These updates allow you to tailor the gadget to meet current needs and reflect more meaningful regional nomenclature.

### Enhancements

Introduced several user interface and security updates.
