

EMResource® 4.3 Release Notes

These notes describe highlights of the EMResource 4.3 release scheduled for Wednesday, June 8, 2022. More information is available through the help in your solution or by contacting the Juvare Support at 877-771-0911 or support@juvare.com.

Bulk Update NEDOCS Scores

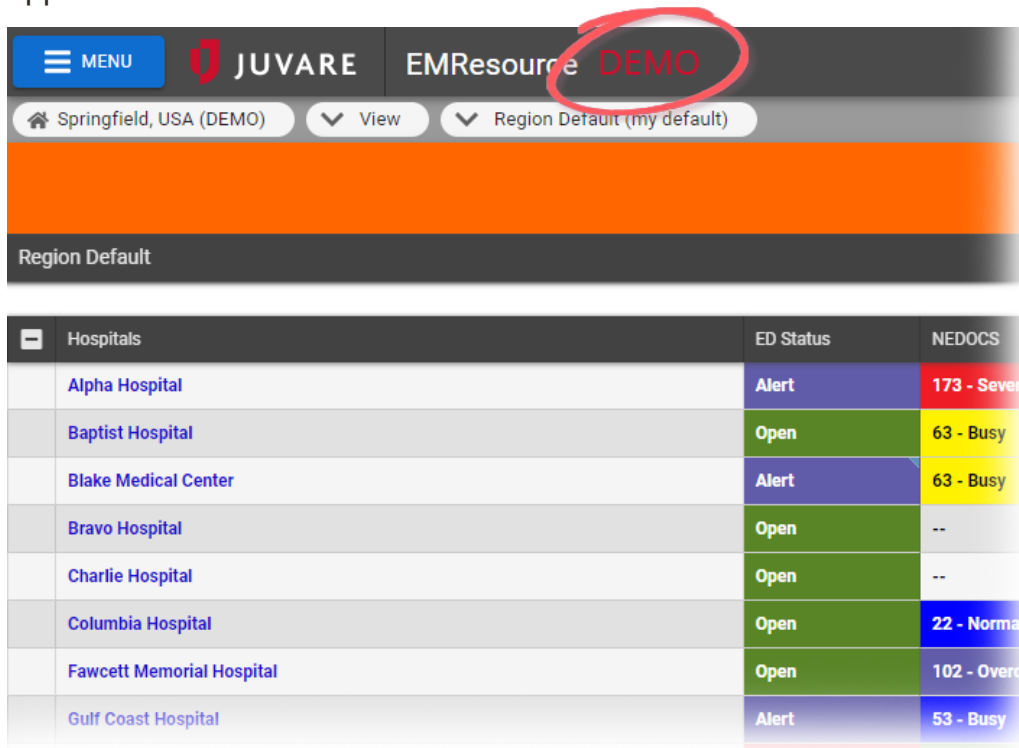

Now, you can update your facility's NEDOCS scores using the Bulk Upload or Automated Data Uploader (ADU).

HHS TeleTracking COVID-19 Data Template

The most recent version of the Health and Human Services' (HHS) TeleTracking COVID-19 data template is now available. The new template allows you to import your facility's Status Types, without needing to adjust the data headers, through the Bulk Upload or Automated Data Uploader.

Solution Bar Identifies Environment

To remind you when you are working in a non-production environment, the word DEMO now appears on the solution bar in that environment.

The screenshot shows the EMResource interface. At the top, there is a navigation bar with a 'MENU' button, the 'JUVARE' logo, and the text 'EMResource DEMO'. The 'DEMO' text is circled in red. Below the navigation bar, there are three dropdown menus: 'Springfield, USA (DEMO)', 'View', and 'Region Default (my default)'. Below these is a large orange bar, and then a dark grey bar with the text 'Region Default'. Below that is a table with the following data:

Hospitals	ED Status	NEDOCS
Alpha Hospital	Alert	173 - Severe
Baptist Hospital	Open	63 - Busy
Blake Medical Center	Alert	63 - Busy
Bravo Hospital	Open	--
Charlie Hospital	Open	--
Columbia Hospital	Open	22 - Normal
Fawcett Memorial Hospital	Open	102 - Overcrowded
Gulf Coast Hospital	Alert	53 - Busy

Improved Display on Setup Users

Now, when creating and updating profiles on the Setup Users page, long resource names are displayed in full, without being truncated on certain displays.

Resolutions

- An issue that prevented the Notification Summary Report from adjusting to the local time zone was resolved.
- An issue that disabled a quick link was resolved.
- For clients that have not yet migrated to Juvare Login Services, on the logout page, the Go Back button now takes you back to the login page as expected.
- Now, when a Resource Administrator creates a new user, the user is granted the same resource view rights as the Resource Administrator.
- Help text is now displayed when copying a form from one region to another.
- On views for other regions, when you click the name of a status type, the definition displays in a window as expected.
- Now, if you cancel changes you made to a person's preferences, you are directed to their user profile page as expected.
- A message that appears when you attempt to run a Resource Details Report without selecting any resources was improved.
- On the Jobs List, a message indicates that only reports generated within the last seven days are available.
- An issue that caused a confirmation message to appear when updating event notification preferences in bulk was resolved.
- The data validation process for email addresses was improved.
