

EMResource[®] Product Announcement

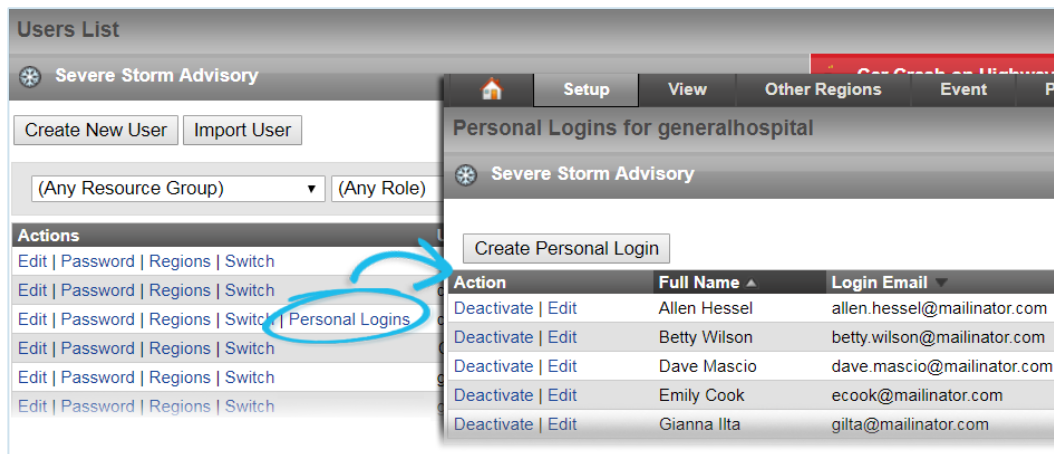

Version 3.36

This announcement describes changes made in the EMResource 3.36 release, which is scheduled for January 3, 2018. More information about these and other features is available through the Help Center or your Customer Success Manager.

Introduced Personal Logins for Shared Accounts

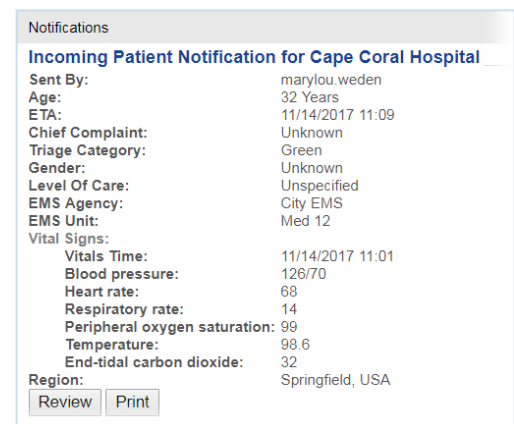

User accounts that are designated as “shared” allow multiple users to access a single, common account in order to manage and update facility information. Users all see the same information, as determined by the shared account settings, and their actions are attributed to the shared account – not the individual user.

Shared accounts now allow users to create “personal logins,” based on their email addresses, so they can create and manage their own password for accessing the shared account. Personal logins allow users to securely manage their own access to the shared account without affecting other users’ access to the account.

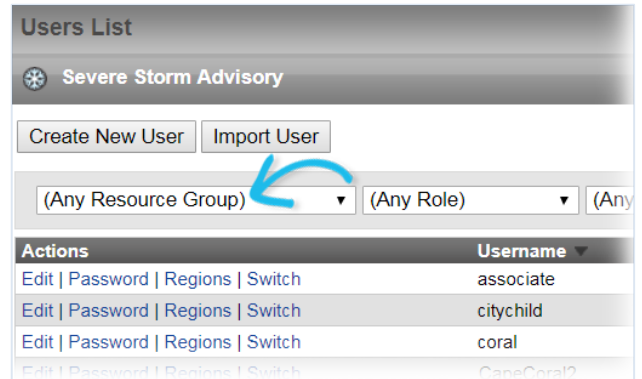

Added Vital Signs to Incoming Patient Notifications

Working in conjunction with EMTrack, vital signs can now be sent to facilities with incoming patient notifications (IPNs). Providing this valuable information about the patient’s condition before they arrive allows facilities to better prepare for the patient.

Added Filtering by Resource Group

Resource groups can now be used, like other components, to filter and search for resources, users, views, and reports. For example, when looking for a user, you can filter the list of users to show only those that belong to a specific resource group, role, and/or resource type.

Updated the Notifications Report

The Notification Detail Report, which is downloaded in Microsoft® Excel® format, was updated to reposition the region name and report date range at the top and rearrange the order of columnar data.

Added ZIP Code™ to Resource Details Report

A new field was added to the Resource Detail Report that allows facilities to capture and analyze data by ZIP Code.

Enhanced the Dashboard and Dashboard Gadgets

Several minor enhancements were made to the recently introduced dashboards and dashboard gadgets in an effort to provide additional display options.

For more information, contact your Customer Success Manager or the support desk at 888-735-9559; in the support phone system, press 1 for Client Application Support and then 6 for EMSystems.
