EMResource® Release Notes

These notes describe highlights of the EMResource 3.45.2 release scheduled for Thursday, April 9, 2020. More information is available through your solution or by contacting Juvare Support at 877-771-0911 or support@juvare.com.

Deactivated Resources

Resolved an issue in which deactivated resources are included in multi-region events when the "Include all Resources" option is selected. Deactivated resources no longer appear in multi-region events when the specified option is selected.

Form Detail Reports

Updated the query that generates the Form Detail Report to now include **all** completed forms that were either activated or completed in a selected date range.

Premium Add-On: Facility-Based Inbound Interface into EMResource

Developed an application programming interface (API) that allows facilities to update resource statuses, such as Bed Availability, Emergency Department status, and other numeric or text statuses. These statuses can be automatically updated with data from another solution without having to log into EMResource.
