

EMSupply™ 1.12 Release Notes

These notes describe highlights of the EMSupply 1.12 release scheduled for Wednesday, September 30, 2020. More information is available through your solution or by contacting the Juvare Support Center at 877-771-0911 or support@juvare.com.

Notifications for Resource Requests

Introduced the ability to receive email notifications for Resource Requests submitted in EMResource. You can now receive email notifications when a Resource Request is created, confirmed, or picked up. Notifications are also sent when the status of the Resource Request is changed to “QC”, “Ready for Shipping”, “Loading for Transportation”, “Transporting”, and “Complete”. This new capability provides greater visibility into the request and approval workflow.

Enhancements

Introduced several system improvements and security updates.
