

## EMSupply™ 1.4.7 Release Notes

These notes describe highlights of the EMSupply 1.4.7 release scheduled for Thursday, April 23, 2020. More information is available through your solution or by contacting the Juvare Support Center at 877-771-0911 or [support@juvare.com](mailto:support@juvare.com).

### Resource Requests

- Added the ability to filter inventory items when creating a new Resource Request. You can now view all inventory items, which is the preset default, or view only available items in the selected Customer, Region, or Location, eliminating the need to make item updates to the Resource Request form.

- Updated the Resource Requests page to include the location and region of the requesting location.

### Incoming Shipments

Updated the Incoming Shipments page to display additional delivery location details. The shipment delivery location and its region now appear in the Delivery Location column.

### Pick Slips and Packing Lists

Updated the warehouse Pick Slips and Packing Lists to include Contact Name and Contact Number. The updated contact information now appears on the first page of the Shipping List and in the printed PDF, providing added quality assurance.

## Performance Improvements

- Enhanced performance capabilities to better coordinate and respond to COVID-19-related events.
- Performed various fixes and security updates, improving operational processes and solution performance.
