EMTrack® 5.2 Release Notes

These notes describe enhancements introduced in the EMTrack 5.2 release scheduled for Wednesday, February 10, 2021. Please follow the link to view the release notes for EMTrack 5.0 and 5.1 releases. More information is available through your solution or by contacting the Juvare Support Center at 877-771-0911 or support@juvare.com.

Resolutions

Resolved minor issues related to usability and navigation.

Vaccination Module

The Vaccination Module is a licensed premium module in EMTrack that is used to manage the COVID-19 immunization initiative. The module allows you to effectively manage vaccination events with features that include event creation, scheduling, registration, ticketing, and intake. For more information, see the Mass Testing and Vaccination page on our website or contact your Client Success Manager (CSM).
