

EMTrack® 6.1.1 Release Notes

These notes describe enhancements in the EMTrack 6.1.1 release scheduled for Wednesday, January 18, 2023. More information is available through your solution or by contacting the Juvare Support Center at 877-771-0911 or support@juvare.com.

EMTrack Lite Driver License Scanning Update

To continue using the driver license scanning feature in EMTrack Lite, you must uninstall the EMTrack Lite solution on all Windows devices and then reinstall the solution.

As a reminder, EMTrack Lite can be installed and configured on Windows devices for online and offline use.

Login Email No Longer Case-Sensitive

Now, the login email address used to access your EMTrack account is no longer case-sensitive. This means your login email is accepted regardless of whether you use lower or upper-case letters. For example, info@example.com and INFO@EXAMPLE.COM are both valid.

Incident Site and Mobile Provider Unit Sorting

On the Incidents tab, when editing an Incident, the Incident Sites are sorted alphabetically. Similarly, on Systems Settings, when editing Mobile Providers, Units are sorted alphabetically.
